 - Batch BOL (if necessary)
- Capturing and Returning ASN (EDI 856) Data
 - Includes carton level details and tracking numbers

Advanced Features

- Barcode Scanning
 - Lot Number, Serial Number and/or Expiration Date Tracking
- EDI Integration Ready
 - 6 Standard File Formats
 - X12
 - Tab-Delimited
 - Fixed Position Flat-File
 - XML
 - or
 - Pre-wired with EDI Service Providers: SPS Commerce, DiCentral, ActData, and Spring Systems

Direct EDI Integration

Retail Customers

Supplier

3PL Central Standard Formats (X12, Tab-delimited, Fixed Position Flat File or XML)

3PL Warehouse

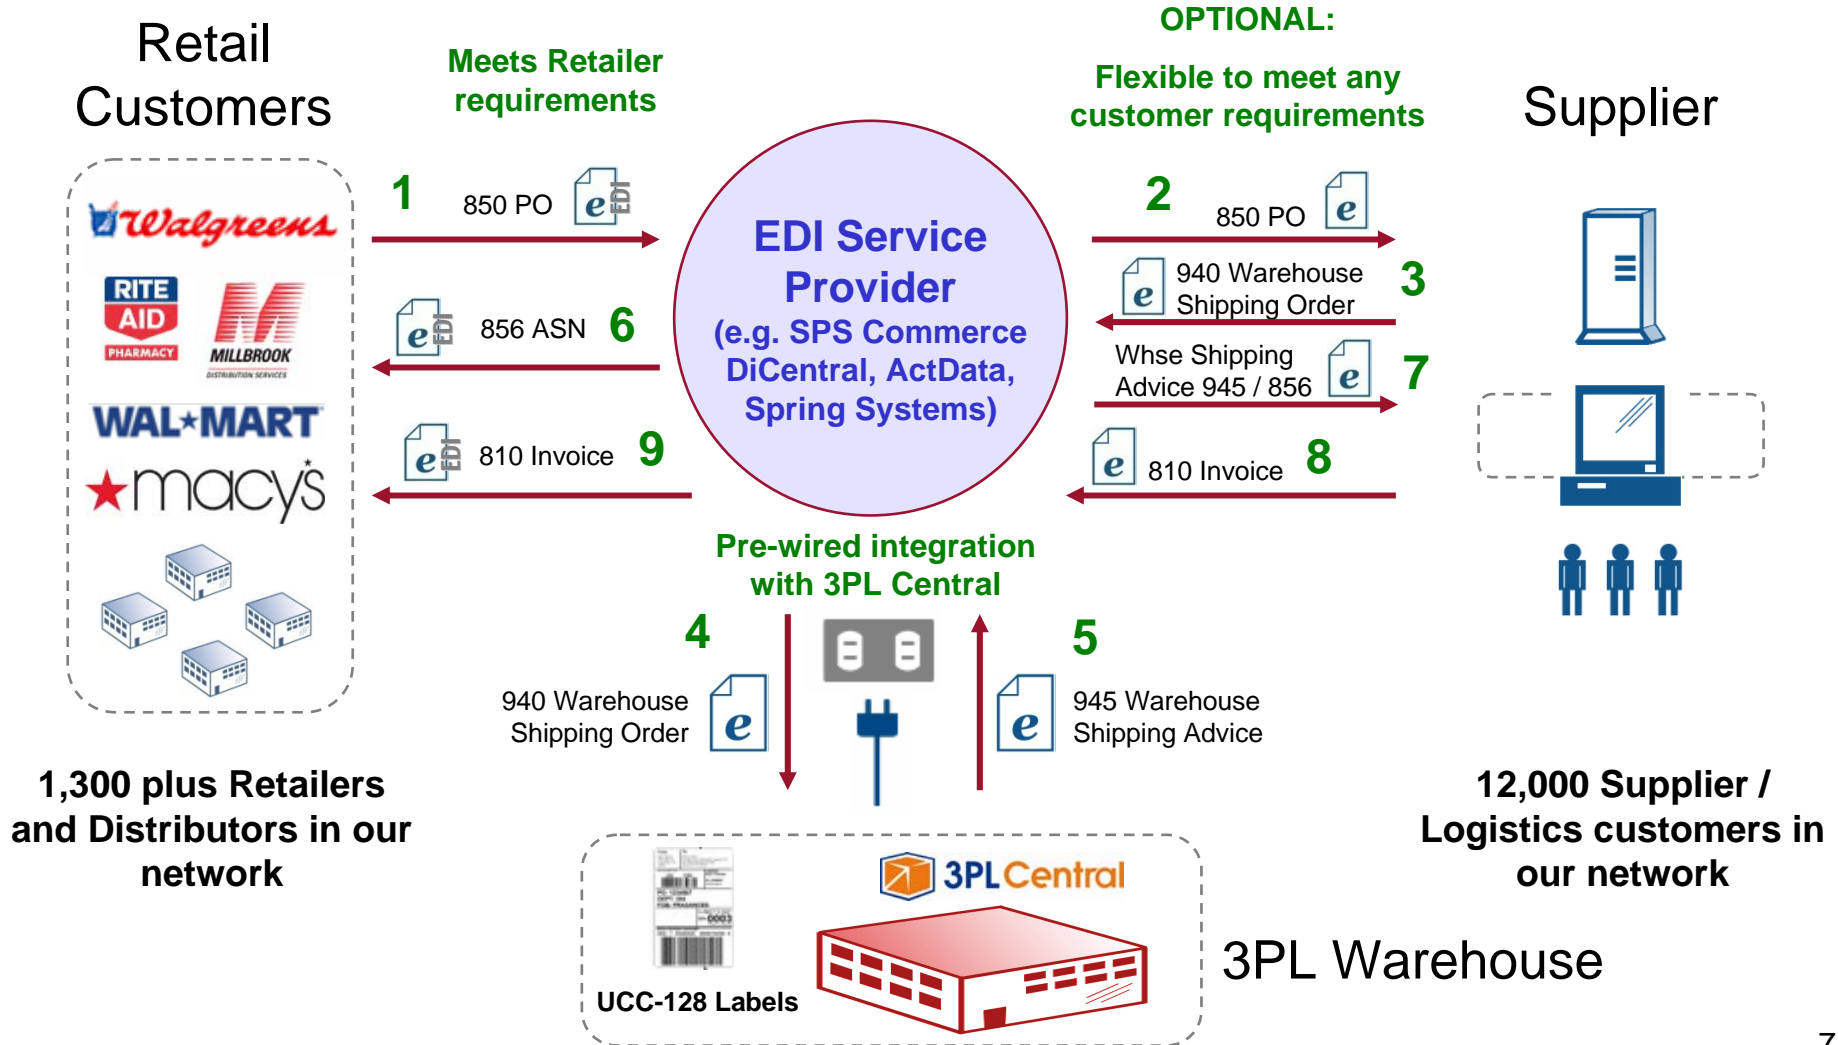

3PL Central supports direct integration with suppliers in the following situations:

- Supplier maps to one of 3PL Central's standard formats (X12, Tab-delimited, Fixed Position Flat File or XML)
- 3PL Central performs custom programming (for a fee) and maps to the supplier's formats
- Business-to-Business – When no direct to retailer communications is needed (e.g. EDI 856). For retailer integration we partner with SPS Commerce, DiCentral, ActData and Spring Systems or your existing EDI service provider.

Accuracy

EDI Integration Using Solution Providers

Key EDI Questions:

- What retailers are you connecting to?
- Does your customer require an Advanced Ship Notice (856)?
- Does your customer require UCC-128 Label(s)?
- How do you want to exchange electronic documents?
- How are you doing EDI today? In house software or are you working with a service provider?

Direct-to-Consumer Functionality

Key Direct-to-Consumer Benefits

- Integration via Open API supports integration with all major shopping carts
- Capable of bi-directional communication with shopping carts to accept orders and feed back tracking numbers
- Your logo on the packing slip (fully customizable packing slips)
- Integration with UPS and FedEx and USPS eliminates any shipping errors due to retyping orders/addresses
- Optional email notifications internally or directly to consumers

Support for Multiple Integration Scenarios

Customer Systems

3PL Central Interfaces

Real-Time

Web Services (XML via HTTP)

Create Order Call

Shipping Details Call

Stock Status Call

Scenario:

Shopping Carts would initiate the Web Service Call when orders are ready for shipment.

Every 15 Minutes
